BUSINESS FAILURES DECREASE 6.4 PERCENT IN NOVEMBER

Year-to-date Failures Down 13.5 Percent

NEW YORK, Jan. 22--Business failures decreased 6.4 percent in November 1989 to 3,989 from 4,263 in November 1988, according to The Dun & Bradstreet Corporation.

"After a surprising uptick in failures in October, the downward trend in business bankruptcies was resumed in November of 1989 compared with same month of 1988," said Joseph W. Duncan, corporate economist and chief statistician for The Dun & Bradstreet Corporation.

For the first eleven months of the year, failures fell 13.5 percent to 46,035 from 53,205 in the same period of 1988.

"With the exception of recent increases in bankruptcies in the New England states, the year-to-date trend in failures remains positive," said Duncan.

-more-

In November, business failures were down or flat in every industry sector, with the exception of the manufacturing, the transportation and public utilities and the agriculture, forestry and fishing sectors. The most significant increase was reported in the manufacturing sector, up 7.5 percent to 345 from 321 in November of 1988. Business failures in the agriculture, forestry and fishing sector increased slightly, to 118 from 113. Transportation and public utilities failures increased to 185 from 182.

"While manufacturing failures increased for the second consecutive month, the increase in November was well below the 28.3 percent gain recorded in October," noted Duncan.

The major industry sectors to report decreases in business bankruptcies in November were services, down 14.3 percent to 1,325 from 1,546; construction, down 10.9 percent to 530 from 595; wholesale trade, down 9.2 percent to 287 from 316; retail trade, down 6.7 percent to 832 from 892; and finance, insurance and real estate, down 3.9 percent to 219 from 228. Mining failures remained unchanged, at 35.

"Both the finance, insurance and real estate and the construction sectors posted increases in business failures earlier this year, the recent decreases indicate improvements in these industries," said Duncan.

From a geographical perspective, business failures in November were down in every U.S. Bureau of the Census region, with the exception of the New England, Middle Atlantic and East South Central regions.

In November, business failures in New England increased 111.5 percent to 165 from 78 in November of 1988.

"The New England states are continuing to experience high levels of failures, due to ongoing economic weakness, particularly in Massachusetts," noted Duncan.

Other regions to report increases in business failures in November were the East South Central states, up 69.2 percent to 269 from 159; and the Middle Atlantic states, up 17.8 percent to 391 from 332.

The Mountain states showed the largest percentage decrease in failures in November, down 36.1 percent to 289 from 452; followed by the Pacific states, down 23.6 percent to 683 from 894; the South Atlantic states, down 10.2 percent to 601 from 669; the West South Central, down 7.9 percent to 626 from 680; the West North Central, down 5.4 percent to 243 from 257; and the East North Central states, down 2.7 percent to 722 from 742.

Year to date

Year-to-date business bankruptcies continued the downward trend begun in 1987, dropping 13.5 percent to 46,035 from 53,205. From an industry perspective, failures were down or flat in all major industry sectors, with the exception of the finance, insurance and real estate sector. Finance, insurance and real estate failures increased 11 percent in the first 11 months of 1989 to 2,546 from 2,293 in the first 11 months of 1988.

Duncan noted that finance, insurance and real estate failures increased sharply earlier in 1989, but the trend

appears to be subsiding, failures in the industry fell 3.9 percent in November.

Business bankruptcies in the construction sector have leveled off, reporting 6,331 failures in the first 11 months of 1989 compared with 6,312 in the same period of 1988.

The largest year-to-date decrease in business failures was reported in the mining sector, down 29.1 percent to 326 from 460; followed by services, down 24.6 percent to 16,170 from 21,459; agriculture, forestry and fishing, down 21.6 percent to 1,316 from 1,679; wholesale trade, down 21.2 percent to 3,270 from 4,150; manufacturing, down 10.1 percent to 3,567 from 3,968; transportation and public utilities, down 5.9 percent to 1,839 from 1,954; and retail trade, down 5.6 percent to 10,004 from 10,595.

From a regional perspective, business failures fell in every U.S. Census region, with the exception of the New England states and the South Atlantic states. Year-to-date failures in New England increased 13.6 percent to 1,116 from 982 in the same period of 1988. The South Atlantic region reported a slight increase in the first 11 months of 1989, up 2.2 percent 6,901 from 6,753.

"Earlier in 1989, business failures rose in the South Atlantic states, due to sharp increases in Georgia and Virginia, but the upward trend has slowed," said Duncan.

Significant decreases were reported in the Mountain states, down 25.6 percent to 3,963 from 5,326; and the West South Central states, down 22.2 percent to 7,679 from 9,870.

Other significant decreases were reported in the West North Central states, down 24.8 percent to 2,805 from 3,731; the Pacific states, down 17.8 percent to 9,070 from 11,028; the Middle Atlantic states, down 13.9 percent to 3,738 from 4,341; and the East South Central states, down 5.9 percent to 2,637 from 2,801. The East North Central reported a slight decrease, to 8,126 from 8,373.

The liabilities for failures in the first 11 months of 1989 decreased 9.7 percent to $30.6 billion from $33.9 billion in the same period of 1988.

Dun & Bradstreet's business failures statistics include businesses that ceased operations following assignment or bankruptcy; ceased operations with losses to creditors after such action as foreclosure or attachment; voluntarily withdrew leaving unpaid obligations; were involved in court actions such are receivership, reorganization or arrangement; or voluntarily compromised with creditors.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1988.

BUSINESS FAILURES POST STEEPEST DECLINE SINCE 1978

DROPPING NEARLY 13 PERCENT IN 1989

Business Bankruptcies Up in the New England States

NEW YORK, Feb. 15--Posting the steepest decline in more than a decade, business failures dropped 12.9 percent in 1989 to 49,719 from 57,099 in 1988, according to The Dun & Bradstreet Corporation.

"Failures were down virtually across the board despite a relatively modest surge in the New England states," said Joseph W. Duncan, corporate economist and chief statistician for The Dun & Bradstreet Corporation.

Duncan noted that the increase in New England was primarily due to a sharp rise in bankruptcies in the second half of 1989, particularly in Massachusetts. Failures were up in nearly every industry sector, reflecting increased economic stress throughout the New England region.

Nationwide, the finance, insurance and real estate sector was the only major industry group to report an

-more-

increase in business failures in 1989, up 9.1 percent to 2,770 from 2,540 in 1988.

"The troubled savings and loan industry and the subsequent stress in the real estate sector drove failures up earlier this year, but the upward trend appears to be subsiding," said Duncan.

Business failures in the agriculture, forestry and fishing sector fell 20.6 percent to 1,444 from 1,819.

Duncan noted that the decrease in agriculture bankruptcies was primarily due to sharp declines in the breadbasket states of the West North Central and the East North Central regions.

Mining failures decreased 30.2 percent to 344 from 493, continuing the trend begun in early 1987. Bankruptcies in the mining industry were down in every U.S. Census region.

In 1989, business failures in the services sector fell 23.6 percent to 17,399 from 22,782 in 1988. Services bankruptcies were down or flat in every U.S. Census region, with the exception of the New England states. Wholesale trade failures fell 20.7 percent to 3,534 from 4,459. Retail trade bankruptcies decreased 6 percent to 10,803 from 11,487; manufacturing failures dropped 9.1 percent to 3,840 from 4,226; and transportation and public utilities failures fell 3.7 percent to 2,023 from 2,100. Construction failures were essentially unchanged, at 6,829.

Regional Trends

In 1989, business failures fell in every U.S. Census region, with the exception of the New England and South Atlantic states. In New England, bankruptcies increased 22.3 percent to 1,285 from 1,051. Business failures in Massachusetts climbed 41.9 percent to 789 from 556. Failures in Maine and Rhode Island also increased, while failures in Connecticut, Vermont and New Hampshire decreased.

The South Atlantic states reported a slight increase in business failures, up 3 percent to 7,473 from 7,255, primarily due to increases in Georgia and Virginia earlier in 1989.

"While year-end failures exceeded last year's level in the South Atlantic states, the current trend is down," said Duncan. "Failures fell 4.3 percent in the second-half of 1989 compared with the same period of 1988."

Among the South Atlantic states Georgia, Virginia and North Carolina all reported higher failures in 1989. Florida failures fell slightly to 3,132 from 3,135. Failures increased in every industry in the region, with the exception of the mining, wholesale trade and services sectors.

The largest regional decrease in 1989 occurred in the Mountain states, down 27.1 percent to 4,195 from 5,756. Business failures decreased in every major industry group

in the region. With the exception of a slight increase in bankruptcies in New Mexico, to 392 from 344, every state in the region reported a decrease of greater than 13 percent.

"Bankruptcies in Arizona fell for the first time since 1986, down 13.2 percent to 1,252 from 1,442," said Duncan. "Arizona has clearly reached a turning point, after a surge in failures that was largely attributable to high levels of entrepreneurial activity."

Failures in the agricultural states of the West North Central region also declined substantially, down 23.7 percent to 3,054 from 4,000 in 1988. Agriculture failures continued to fall, down 62.2 percent to 205 in 1989 from 543 in 1988, and well below the 1,309 agriculture failures recorded in 1987. Failures fell in every state in the region, with Minnesota, North Dakota and Kansas reporting decreases of greater than 20 percent.

The oil-producing states of the West South Central region continued to report declining levels of business bankruptcies, down 21.7 percent to 8,252 from 10,542 in 1988.

Duncan noted business failures in the region were down 35.3 percent from the record high of 12,763 reported in 1987.

Failures in Texas dropped 32.4 percent to 5,323 from 7,873. Business bankruptcies in Arkansas and Louisiana

were down, but bankruptcies in Oklahoma were up 43.1 percent, to 1,242 from 868.

Failures in the Pacific states decreased 17.5 percent to 9,748 from 11,811. Failures fell in all five states, with Alaska reporting the sharpest decline, down 50.9 percent to 141 from 287. Business failures in California fell 16 percent to 7,712 from 9,178. On an industry basis failures in the region were mixed, with services failures down and finance, insurance and real estate failures up.

"The Pacific region continues to be one of the best overall performers," said Duncan. "For the past five years, business failures have been down or flat in the region."

The Middle Atlantic states reported an 11.4 percent decrease in bankruptcies, down to 4,094 in 1989 from 4,619 in 1988. Business failures dropped sharply in New Jersey, down 33.1 percent to 575 from 860. In New York failures fell 17.5 percent to 1,948 from 2,360. Pennsylvania, however, reported an increase of 12.3 percent to 1,571 from 1,399.

Business failures in the East South Central states fell 4.4 percent to 2,866 from 2,998. Kentucky and Alabama reported decreases, but Mississippi posted an increase and Tennessee remained unchanged.

The East North Central states reported a 3.5 percent decrease, down to 8,752 from 9,067. Wisconsin reported the sharpest decline, down 36.5 percent to 704 from 1,108. On an industry basis, failures in the region were mixed. Agriculture, forestry and fishing, services and wholesale trade fell, while the finance, insurance and real estate, construction and retail trade were up.

Dun & Bradstreet's business failure statistics include businesses that ceased operations following assignment or bankruptcy; ceased operations with losses to creditors after such actions as foreclosure or attachment; voluntarily withdrew leaving unpaid obligations; were involved in court actions such as receivership, reorganization or arrangement; or voluntarily compromised with creditors.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.
